IN 30 SECONDS

01 Danbooru labels every drawing with short tags, and many anime image models learned from those labels.

02 This page lists 139 tags useful to a 2DFD persona, grouped by theme, each with a plain definition.

03 The definitions are written in plain words from a public copy of Danbooru's wiki dated 2026-04-28. Danbooru's own pages can change.

04 Some tags name a kink. A tag in a prompt is play. Money that moves around the picture is real.

YOU WILL LEARN

- ✓ How tags work in a prompt.
- ✓ Which tags cover the dom, money, chastity, hypnosis, expressions, poses, the look, the framing and the background.
- ✓ Which tags people put in a negative prompt.
- ✓ Where to read the full definition of a tag.

PART 01

How tags work in a prompt

Danbooru is an image board where every drawing carries a list of short tags, written in lowercase with underscores. Many anime image models learned from pictures labelled this way, so a prompt written as a list of tags, separated

by commas, often works better than a sentence. Some tools want the underscores, others want spaces. Try both on your model. ◆

Put the tags that matter most first: who is in the picture, then the look, then the pose, then the framing and the background. Keep a second list of what you don't want, the negative prompt, for things like a watermark or a signature. ◆ The method, with examples, is in Images online, and running a model yourself is in Images at home.

REMEMBER IT

- Tags are short lowercase labels. Most important first.
- Keep a negative prompt for what you don’t want.
- A tag naming a kink is play. Money around the picture is real.
- Check a tag’s page before you rely on it.
